

Please DO NOT pass a ruling that would give LPFM stations priority over translator service. K-Love radio network (a translator service) serves our local community in such a wonderful way by providing positive, family friendly programming that builds the community and appeals to all ages. It would be a great loss to our local community if we lost KLove because of a FCC ruling - as long as K Love is listener supported - we as a local community are voting by giving money to keep it on the air in our area. The stability of having this service greatly outweighs the instability of other local stations that have gone off the air in the past because they would not get enough financial support to remain on the air. I can recall at least three of these local stations that have gone off the air in our area for this reason in the past 10 years. The services K Love provides is a great public service to Texarkana, TX and I believe Texarkana is a better place because of K Love radio. I do not want to lose this service and I do not want any other communities to lose their service - I believe this ruling is not in the public interest of any local community.
